

Immidi Infotech is a fast-growing Technology Company located in Frederick, Maryland. Founded in 2009 and has a decade of experience in Technology Support, Infrastructure, Cloud, Security, Project Management, Operations & Maintenance, Application support and data center operations and data center migrations.

Immidi Infotech has vast expertise and experience in technology implementations, and exceeding beyond expectations in Quality and timeliness delivery.

Services and Solutions:

PROGRAM AND PROJECT MANAGEMENT

- Program Planning and Execution
- Implementing frameworks and approaches and develop strategy
- Develop and enforce project management practices and processes
- Review, monitor and manage projects and Resource Management
- Continuous Improvement in practices and processes.

SOFTWARE DEVELOPMENT & SUPPORT

- Custom application development and deployment
- Complete SDLC implementation
- Technical support after implementation
- Rapid Application development and deployment in multiple technologies
- Strict adherence to benchmarks and exceed client's expectations.

INFRASTRUCTURE TRANSFORMATION AND MANAGEMENT

- Infrastructure migration to Cloud and application transformation
- Application life cycle implementation and engineering
- Application Security/Cyber Security implementation and compliance
- Application containerization and management
- Rapid deployments with CI/CD and DevOps
- Robust Engineering and Architecture for Security/Infrastructure/Applications
- Enterprise grade Standards, Systems, Processes, Procedures, Security and Management.

DATA ANALYTICS AND BUSINESS INTELLIGENCE

- Enterprise grade Data warehouse and Data lakes implementation
- Data Analytics/conversion/processing for mission critical applications and real time processing.
- Seamless Data Integration and transformation between Legacy/Cloud/On-prem systems
- Data Architecture/Design and Migration.
- Design/Develop custom, tailored on-demand data management solutions

CENTER OF EXCELLENCE

- Incorporate proven methodologies and procedures to provide excellent service
- Embed ITIL, Agile, Scrum, Kanban into projects for effective operations and management
- In-House knowledge management systems to support teams
- Continuous Improvement and Innovation
- Quality Assurance at best in all levels of project management and execution
- On-Demand Solutions and Resource provision for various projects

PROGRAM AND PROJECT MANAGEMENT

PROGRAM MANAGEMENT: Our program management experts define Program Vision, Goals and objectives and develop road maps. Develop work breakdown structure and align the program goals. Manage and coordinate between various projects of the program and execute projects effectively.

PROJECT MANAGEMENT: We developed and implemented frameworks and approaches along with strategies on managing projects and deliver projects on-time, in the given budget and exceeding the set goals. Also practice and implement processes and procedures to complete projects successfully.

SOFTWARE DEVELOPMENT & SUPPORT

SOFTWARE LIFE-CYCLE IMPLEMENTATION: Our talented workforce develops end-to-end (SDLC) software applications which are custom tailored for the client needs. We use various tools and technologies integrated with best practices and procedures in synergy with various teams who are SMEs, managed and coordinated by experienced project managers who deliver products which exceed performance benchmarks and client's expectations.

CONTINUOUS IMPROVEMENT AND TECHNICAL SUPPORT: We provide continuous improvement of the product and keep the product update in all aspects including security, new updates, new functionality and workflows. We implement the product and provide technical support and technical know-how to client and work towards successful knowledge transfer to client.

INFRASTRUCTURE TRANSFORMATION AND MANAGEMENT

DATACENTER MODERNIZATION: We provide data center consolidation and migration. Also provide infrastructure migration to cloud and containers, from traditional to service based environments. Develop and custom design multi-cloud, hybrid cloud solutions for the clients as per their needs. Build cloud based environment, through rapid automation and scripting.

DEVOPS AND INFRASTRUCTURE DEVELOPMENT: We provide DevOps solutions and CI/CD solutions for quick deployments and support rapid application development. We design and develop processes and procedures suitable for each client's environment and with quick turnaround time.

INFRASTRUCTURE SECURITY: We develop Robust Engineering and Architecture for Security/Infrastructure/Applications in all application tier infrastructures and incorporate Enterprise grade Standards, Systems, Processes, Procedures, Security and Management.

DATA ANALYTICS AND BUSINESS INTELLIGENCE

ANALYZE AND PROCESS: Large scale processing of data analysis, by collecting, inspecting and cleaning. Interpret data and generate reports to clients. Our Analytics teams perform and provide insight to the client to make best business decisions. Perform Data Analytics/conversion/processing for mission critical applications and real time processing. Seamless Data Integration and transformation between Legacy/Cloud/On-prem systems.

LARGE SCALE DATA WAREHOUSE: Enterprise grade Data warehouse and Data lakes implementation. Data Architecture/Design and Migration. Design/Develop custom, tailored on-demand data management solutions.

CENTER OF EXCELLENCE

KNOWLEDGE BANK: We designed a process to store all the knowledge and troubleshooting and resolution data into an in-house knowledge bank for future use by teams. This is one of the initiatives on keeping the wealth of knowledge.

METHODOLOGIES: Immidi Infotech follows standard methodologies, processes, procedures, systems like ITIL, Agile, Scrum, Kanban and tools to increase and improve productivity and improve performance and quality delivery.

IMPROVEMENT AND INNOVATION: We developed methodologies to have innovation and continuous improvement as a part of day to work and inculcate such habit into our technical resources to have perfectionism and attention to detail on the deliverables. This also improves the quality of service and product quality and performance, which is a huge plus for the company.

ON-DEMAND SOLUTIONS: We provision technical and managerial resources, solutions, on demand as needed by the customer, to resolve various technical issues. Our on-demand team is available to jump on to anything that the customer wants, in a short notice and take up the task.
